Solving Difference Equations:

1. Solve the following difference equations using recursion first by hand (for $\mathrm{n}=0$ to $\mathrm{n}=4$ ), then using MATLAB (for $\mathrm{n}=0$ to $\mathrm{n}=30$ ). Plot the output computed by MATLAB on a stem plot.
a) $\mathrm{y}[\mathrm{n}]+0.5 \mathrm{y}[\mathrm{n}-1]=2 \mathrm{x}[\mathrm{n}-1] ; \mathrm{x}[\mathrm{n}]=\delta[\mathrm{n}], \mathrm{y}[-1]=0$
b) $\mathrm{y}[\mathrm{n}]+2 \mathrm{y}[\mathrm{n}-1]=2 \mathrm{x}[\mathrm{n}-1] ; \mathrm{x}[\mathrm{n}]=\delta[\mathrm{n}], \mathrm{y}[-1]=0$
c) $\mathrm{y}[\mathrm{n}]+1.2 \mathrm{y}[\mathrm{n}-1]+0.32 \mathrm{y}[\mathrm{n}-2]=\mathrm{x}[\mathrm{n}]-\mathrm{x}[\mathrm{n}-1] ; \mathrm{x}[\mathrm{n}]=\mathrm{u}[\mathrm{n}], \mathrm{y}[-2]=1, \mathrm{y}[-1]=2$
